

## **INTRODUCTION**

**Section 8: PUBLIC EDUCATION**

**Description:** This section will provide examples of public notifications and educational material that are available for schools, organizations and the news media.

**Comments:** The timing of educational material is very important. The implementation date should be clear as to when 9-1-1 service will be available.

Public education requires a teaming of the telecommunications carriers, ETSB's and the media to ensure the effective dissemination of appropriate project information.

An effective public education program is imperative to the implementation, operation and use of an enhanced 9-1-1 system.
